

Core hashset – 75M SHAs, MD5s

Shrinkwrapped & downloaded products

Includes “malware”

Includes application type designation

\$2,500/month to acquire “popular” apps

We take requests

# Other Hashes/Algorithms

SHA256, SHA512, ssdeep

Block hashes: 512/4KiB/8KiB SHA/MD5

Unix “magic” signatures

Archive file content relationships

14,000 original media images on SAN  
18,000,000 original distro files on SAN

Researchers may run code at NIST  
against the collection

Preparing to offer VMs for executing  
objects

Revisiting Windows Registry Dataset

Linking apps to Nat'l Vulnerability Database

Smartphone app hashes

Possible support for memory forensics

Smart unpacking of archive files
